-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The references cited in the Search Report dated March 3, 2004 have been considered.

### ***Claim Objections***

2. Claim 6 is objected to because of the following informalities: in claim 6, a period should be inserted after the formula. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 5, 7, 8, 14 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Tartter.

Tartter teaches a compound of the formula

wherein Me is cobalt or chromium; X is  $-\text{COO}-$ ; Y is H;  $\text{Y}^1$  is H; n is 1 or 2; R and  $\text{R}^1$  and  $\text{R}^2$  and  $\text{R}^3$  together with the carbon atoms connecting them are of the formula

wherein Z is H and A and B are cations (i.e. counterions). Tartter further teach an ink composition containing the above compound and a liquid medium such as alcohols, glycols and esters. See col. 1, lines 14-15, col. 2, lines 11-60, col. 3, lines 1-36, col. 4, lines 20-21, the examples, col. 7, lines 11-40 and claim 1. The compound and ink

composition containing the compound as taught by Tartter appears to anticipate the present claims.

It is the examiner's position that the above compound does possess solubilizing groups however, they are not water-solubilizing groups. The present claims do not specify that the solubilizing groups are water-solubilizing groups. Therefore, the dye compound of Tartter encompasses the present claims.

#### ***Allowable Subject Matter***

5. Claims 2-4, 6, 9-13 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. The following is a statement of reasons for the indication of allowable subject matter: Tartter fails to teach or fairly suggest a printing ink composition wherein: (1) the liquid carrier is water; (2) M is copper; (3) at least one of  $X_1$  and  $X_2$  is an alkali metal ion; (4) the dye is of the formula

Art Unit: 1755

(5) an ink jet cartridge containing the above ink composition; (6) an ink jet printing method using the above ink composition or a compound of the formula

wherein  $M$  is copper as claimed by applicants.

### Conclusion

The remaining references listed on forms 892 and 1449 have been reviewed by the examiner and are considered to be cumulative to or less material than the prior art references relied upon in the above rejections.
